Framence's cutting-edge technology offers a revolutionary way to capture, visualize, and interact with industrial environments, making it a valuable addition to the toolkit of any technology and software company. By partnering with Framence, interested companies can tap into a host of benefits that will enhance their competitive edge and drive growth. Partners will gain access to Framence's state-of-the-art digital twin platform and will be able to offer photorealistic digital twins of industrial environments to their clients. This innovative technology will set partners apart in a rapidly evolving market allowing them to grow their revenue.

Both established players as well as startups in the industry are welcome to join the free webinar.

To register for one of Framence's free partner webinars and learn more about the exciting opportunities for collaboration, please visit www.framence.com/events/.

The webinar will be held in English.

About Framence

Framence, located in Bensheim, Germany, was established in January 2019 by Dr. Peter Merkel and Mr. Adrian Merkel, who serve as managing directors. This dynamic startup develops groundbreaking technologies dedicated to digitizing buildings and facilities. The FRAMENCE software revolutionizes the creation of hybrid models and digital twins by leveraging simple photo panoramas in a cost-effective manner. With a combined experience of over 40 years in the realm of graphics-intensive software solutions, Framence is at the forefront of advancements in AI, machine learning, and image recognition.
