Bensheim, Germany - September 25, 2023 – Framence, a pioneering German startup creating photorealistic digital twins of industrial facilities, received an award at the World of Digital Built Environment 2023 conference.

The annual World of Digital Built Environment conference was held for the sixth time and is sponsored by the Finnish Association of Civil Engineers (RIL), the Estonian and Finnish Ministries of the Environment, the Estonian Digital Construction Cluster, the association for sustainable urbanization Bloxhub, and the European Union. The two-day event provides a comprehensive overview of the most important current events and solutions in the field of digitization of existing buildings and industrial facilities. This year's focus was on environmental protection. Framence participated in the conference with a presentation on the benefits of digital twins for optimizing business processes and increasing resource efficiency, which leads to a reduction of the environmental footprint of companies.

During the conference, awards were presented in a total of six categories. The Germany-based company emerged as the winner in the category “Most Advanced Digital Twin”. “We are thrilled and deeply honored to have received the ‘Most Advanced Digital Twin’ award at the World of Digital Built Environment,” said Adrian Merkel, Managing Director of Framence. “This award is a testament to our commitment to developing innovative solutions that have a positive impact on the building industry worldwide.”

The startup is looking forward to next year's conference and announces its participation.

About Framence

Framence is a pioneer in the development of photorealistic digital twins for buildings and industrial environments. Framence’s technology enables companies to create highly accurate digital twins of technical assets and entire technical environments. By using Framence’s digital twins, companies can significantly optimize planning processes, ensure much more efficient operations, and can thereby realize important financial benefits and savings.
