Smart Factory, based in Lima, Peru, is a dynamic player in the industrial automation sector, offering a comprehensive range of services and products. Their product line includes state-of-the-art hardware such as sensors for machines and equipment for measuring assets' performance. In addition, Smart Factory provides expert consulting services in industrial automation, ensuring that clients receive tailored solutions to enhance their operational efficiency. In its mission to expand its portfolio in Peru, the company has identified bottling companies as another business area where photorealistic digital twins will be playing a pivotal role.

By combining Framence's digital twin technology with Smart Factory's integral solutions, the collaboration aims to create more streamlined and intelligent industrial processes. The union of expertise will not only benefit existing clients but also open new ways for innovation across various industries. Displaying IoT data, predictive maintenance and remote control will be some of the areas where the collaboration will showcase fruitful outcomes.

“We are excited about this collaboration with Smart Factory, as it aligns with our vision of advancing industrial automation through digital twin technology,” said Adrian Merkel, Managing Director at Framence.

About Framence

Framence is a pioneer in the development of photorealistic digital twins for buildings and industrial environments. Framence's technology enables companies to create highly accurate digital twins of technical assets and entire technical environments. By using Framence's digital twins, companies can significantly optimize planning processes, ensure much more efficient operations, and can thereby realize important financial benefits and savings. For more information, please visit www.framence.com.

About Smart Factory

Smart Factory S.A.C. is a Peruvian company specializing in automation, instrumentation, and control of industrial processes. The company serves the industrial sector by supplying equipment for instrumentation and process control, providing engineering services, and developing comprehensive automation projects.

Smart Factory boasts a team of experienced engineers ready to offer all the technical support needed within a framework of quality, guarantee, and reliability. The company's expertise and professional support are directed towards providing clients with the most suitable solutions at the most cost-effective rates.
