

Framence partners with Indian company Pratiti to help digitize industrial environments with photorealistic digital twins

The German software company Framence has announced a strategic partnership with the Indian digital product engineering company Pratiti. Framence specializes in photorealistic digital twins for industrial environments, while Pratiti is active in the areas of digital twins, Industrial IoT, cloud & edge computing, data analytics and AR/VR, among others. Together, they aim to support companies in their digital transformation by combining Framence's realistic digital twins with Pratiti's digital technology expertise.

X

Bensheim, Germany, January 16, 2024 – Framence, a leading software company from Germany that specializes in the creation of photorealistic digital twins for industrial environments, announces a strategic partnership with Pratiti. The company, a global player, develops custom digital solutions in areas such as digital twins, IoT, cloud and edge computing, data science, AR and VR. This collaboration aims not only to drive innovation, but also to support companies in their digital transformation.

Framence is at the forefront of the digital revolution, using cutting-edge technologies to create realistic and accurate digital twins of industrial assets. These photorealistic representations provide unprecedented insights into technical environments such as factories, enabling companies to optimize processes, improve efficiency and make informed decisions.

With in-depth knowledge in areas such as digital twins, IoT, cloud computing, edge computing, data science & analytics and AR/VR, Pratiti enables industrial customers from Digital Factory, Smart Buildings, Energy Generation and Transmission, and Telecommunication and software companies to navigate the complex digital landscape. Application areas cater to key assets in such industries like Rotary Machines, Metal Smelters, Power Inverters & Transformers, and industrial HVAC systems from operations, maintenance, supply chains, logistics, inventory optimization, employee safety, QA and more.

“This partnership brings together the best of both worlds – Framence’s expertise in creating realistic digital twins and Pratiti’s deep understanding of digital technologies. Together, we strive to set new standards in the digital transformation process for our clients,” says Adrian Merkel, Managing Director at Framence.

“At Pratiti, we are committed to technological progress and enabling our customers to succeed in the digital age. Working with Framence allows us to enhance our portfolio by integrating photorealistic digital twins into our solutions. We look forward to a successful collaboration that will benefit our customers,” says Nitin Tappe, CEO of Pratiti.

About Framence

Framence is a pioneer in the development of photorealistic digital twins for buildings and industrial environments. Framence’s technology enables companies to create highly accurate digital twins of technical assets and entire technical environments. By using Framence’s digital twins, companies can significantly optimize planning processes, ensure much more efficient operations, and can thereby realize important financial benefits and savings.
