Framence secures finalist position in the 2024 Factory Innovation Awards

Framence, a developer of photorealistic digital twins, has been nominated as a finalist for the Factory Innovation Award, a major award in the field of smart factory software in Europe. The platform enables users to access detailed digital images of plants at any time and from anywhere, which optimizes processes such as maintenance and production workflows.

Bensheim, Germany, March 21, 2024 – Photorealistic digital twin developer Framence is proud to announce its nomination as a finalist in this year's Factory Innovation Awards.

The FRAMENCE platform revolutionizes access and management of physical assets by creating photorealistic digital twins. The solution enables users to access detailed, true-to-scale digital images of plants and factories at any time and from anywhere, optimizing various processes across industries such as maintenance, production processes, onboarding and knowledge management.

The Factory Innovation Award is one of the most important awards for smart factory software in Europe and plays a central role in promoting Industry 4.0 and digital transformation. The awards are conducted by an independent jury of renowned experts from various fields. The award is organized by the The Center for Industry 4.0 at the German University of Potsdam in cooperation with the German

GITO publishing house and the German trade journal FACTORY INNOVATION, a leading journal for the smart factory market.

"We are honored to have been nominated as a finalist in the Factory Innovation Awards. This award reflects the hard work of our team to provide companies with a solution that allows them to sustainably optimize their factory processes," says Adrian Merkel, Managing Director of Framence.

More information about the award can be found on the website of the organizers (only available in German): Factory Innovation Award 2024 - GITO EVENTS

About Framence

Framence is a pioneer in the development of photorealistic digital twins for buildings and industrial environments. Framence's technology enables companies to create highly accurate digital twins of technical assets and entire technical environments. By using Framence's digital twins, companies can significantly optimize planning processes, ensure much more efficient operations, and can thereby realize important financial benefits and savings.
