FRAMENCE announces strategic partnership with Resolve IT to enhance photorealistic digital twin solutions

Framence, a German digital twin technology leader, has partnered with Moldovan IT solutions provider Resolve IT. The collaboration aims to boost digital twin adoption across various industries in Moldova and Romania, such as agriculture and manufacturing. Framence will integrate its photogrammetry-based platform with Resolve IT's expertise in digital transformation, offering clients improved visibility, management, and maintenance of their assets. The partnership will roll out through personalized demos and a phased implementation process.

Bensheim, Germany, September 10, 2024 – Framence, a German leader in photorealistic digital twin technology, announces a strategic partnership with Resolve IT, a Moldovian provider of web-based solutions and B2B integrations. This collaboration aims to leverage Resolve IT's expertise in digital transformation to enhance the adoption of FRAMENCE's cutting-edge digital twin technology across multiple industries, including agriculture, facility management, and manufacturing in Moldova and Romania.

Through this partnership, Framence will integrate its photogrammetry-based platform with Resolve IT's advanced automation and IT solutions. By creating digital twins that combine real-world images with precise measurements, the platform provides clients with unmatched visibility into their facilities, enabling more effective management, predictive maintenance, and performance optimization.

"Our combined expertise will enable clients to leverage the full potential of digital twins, transforming their operations with highly accurate, real-time data, and significantly improving decision-making across their facilities and assets," said Adrian Merkel, Managing Director of Framence.

Resolve IT will play a key role in delivering tailored digital transformation strategies, helping clients seamlessly implement digital twin technology. The integration will follow a step-by-step strategy, beginning with personalized demos, in-depth audits, and the digitalization of the most valuable aspects of the clients' businesses. This will be followed by ongoing improvements and automation to further drive results.

"Our goal is to help businesses not only digitalize but also thrive in a competitive landscape by leveraging technology. By working closely with our clients, we are committed to delivering solutions that enhance productivity and drive long-term success," said Artiom Shuleansky, CEO of Resolve IT.

About Framence

Framence is a pioneer in the development of photorealistic digital twins for buildings and industrial environments. Framence's technology enables companies to create highly accurate digital twins of technical assets and entire technical environments. By using Framence's digital twins, companies can significantly optimize planning processes, ensure much more efficient operations, and can thereby realize important financial benefits and savings.
