Bensheim, Germany/Burriana, Spain, MONTH, DAY 2025 – Framence, a leading provider of photorealistic digital twins has gained a new partner in Spain: iSmart Blue Solutions. The company, based in Burriana near Valencia, will establish Framence's solutions for photorealistic digital twins across the industry in its home market.

iSmart Blue Solutions is an IT specialist with expertise in the integration of various software products to create customized and powerful individual solutions. With Framence, the company is adding applications for digital twins of buildings and systems to its portfolio.

'We are delighted to have gained an experienced and established partner for Framence in Spain in iSmart Blue Solutions,' says Adrian Merkel, Managing Director of Framence GmbH. 'iSmart Blue Solutions' experience in integrating a wide range of software applications into complex overall solutions is an excellent basis for making them even more powerful and convenient with Framence applications.'

'The solutions we offer generate significant savings for their users. With Framence's photorealistic digital twins, we can now additionally improve the area of security, document management, asset modifications, asset valuation and the overall efficiency of various business processes,' says Francisco Vicente, CEO at iSmart Blue Solutions.

iSmart Blue Solutions chose Framence because the software company from Bensheim in Hesse is a leader in the integration of images and graphics in combination with alphanumeric data.

Framence is at the forefront of the digital revolution, utilizing cutting-edge technologies to create realistic and accurate digital twins of industrial facilities. These photorealistic representations provide unprecedented insights into technical environments such as factories, enabling companies to optimize processes, improve efficiency and make informed decisions.

About Framence

Framence is a pioneer in the development of photorealistic digital twins for buildings and industrial environments. Framence's technology enables companies to create highly accurate digital twins of technical assets and entire technical environments. By using Framence's digital twins, companies can significantly optimize planning processes, ensure much more efficient operations, and can thereby realize important financial benefits and savings.
